

Customer Journey Map

End-to-end experience across the incident lifecycle

DATE	STUDENT NAME	PROJECT
07 October 2026	Gangadevi.R	Incident Life Cycle Automation

Stage	Customer action	Need	Pain point	Automation opportunity	Desired outcome
1. Notice issue	Problem occurs	Needs a way to report	Uncertainty	Simple entry point	Incident created
2. Report	Submits details	Easy, quick form	Repeated data entry	Structured form + ID	Incident logged
3. Wait for ownership	Needs acknowledgement	Know who owns it	No visible owner	Auto assignment	Owner notified
4. Track progress	Checks status	Timely updates	Silent progress	Notifications + timeline	Status visible
5. Escalation	SLA at risk	Fast intervention	Late escalation	SLA timer + rules	Escalation triggered
6. Resolution	Issue fixed	Record what solved it	Closure may be unclear	Resolution + confirmation	Resolved
7. Close & review	Needs confidence	Traceability	History scattered	Audit trail	Closed with history

Journey goal Reduce hand-offs and manual follow-up by making the next lifecycle step explicit and automated.
